

Microsoft Security

Building a safer world together

Asif Valley
National Technology Officer

13 Sep 2023

**Security has never
been more critical**

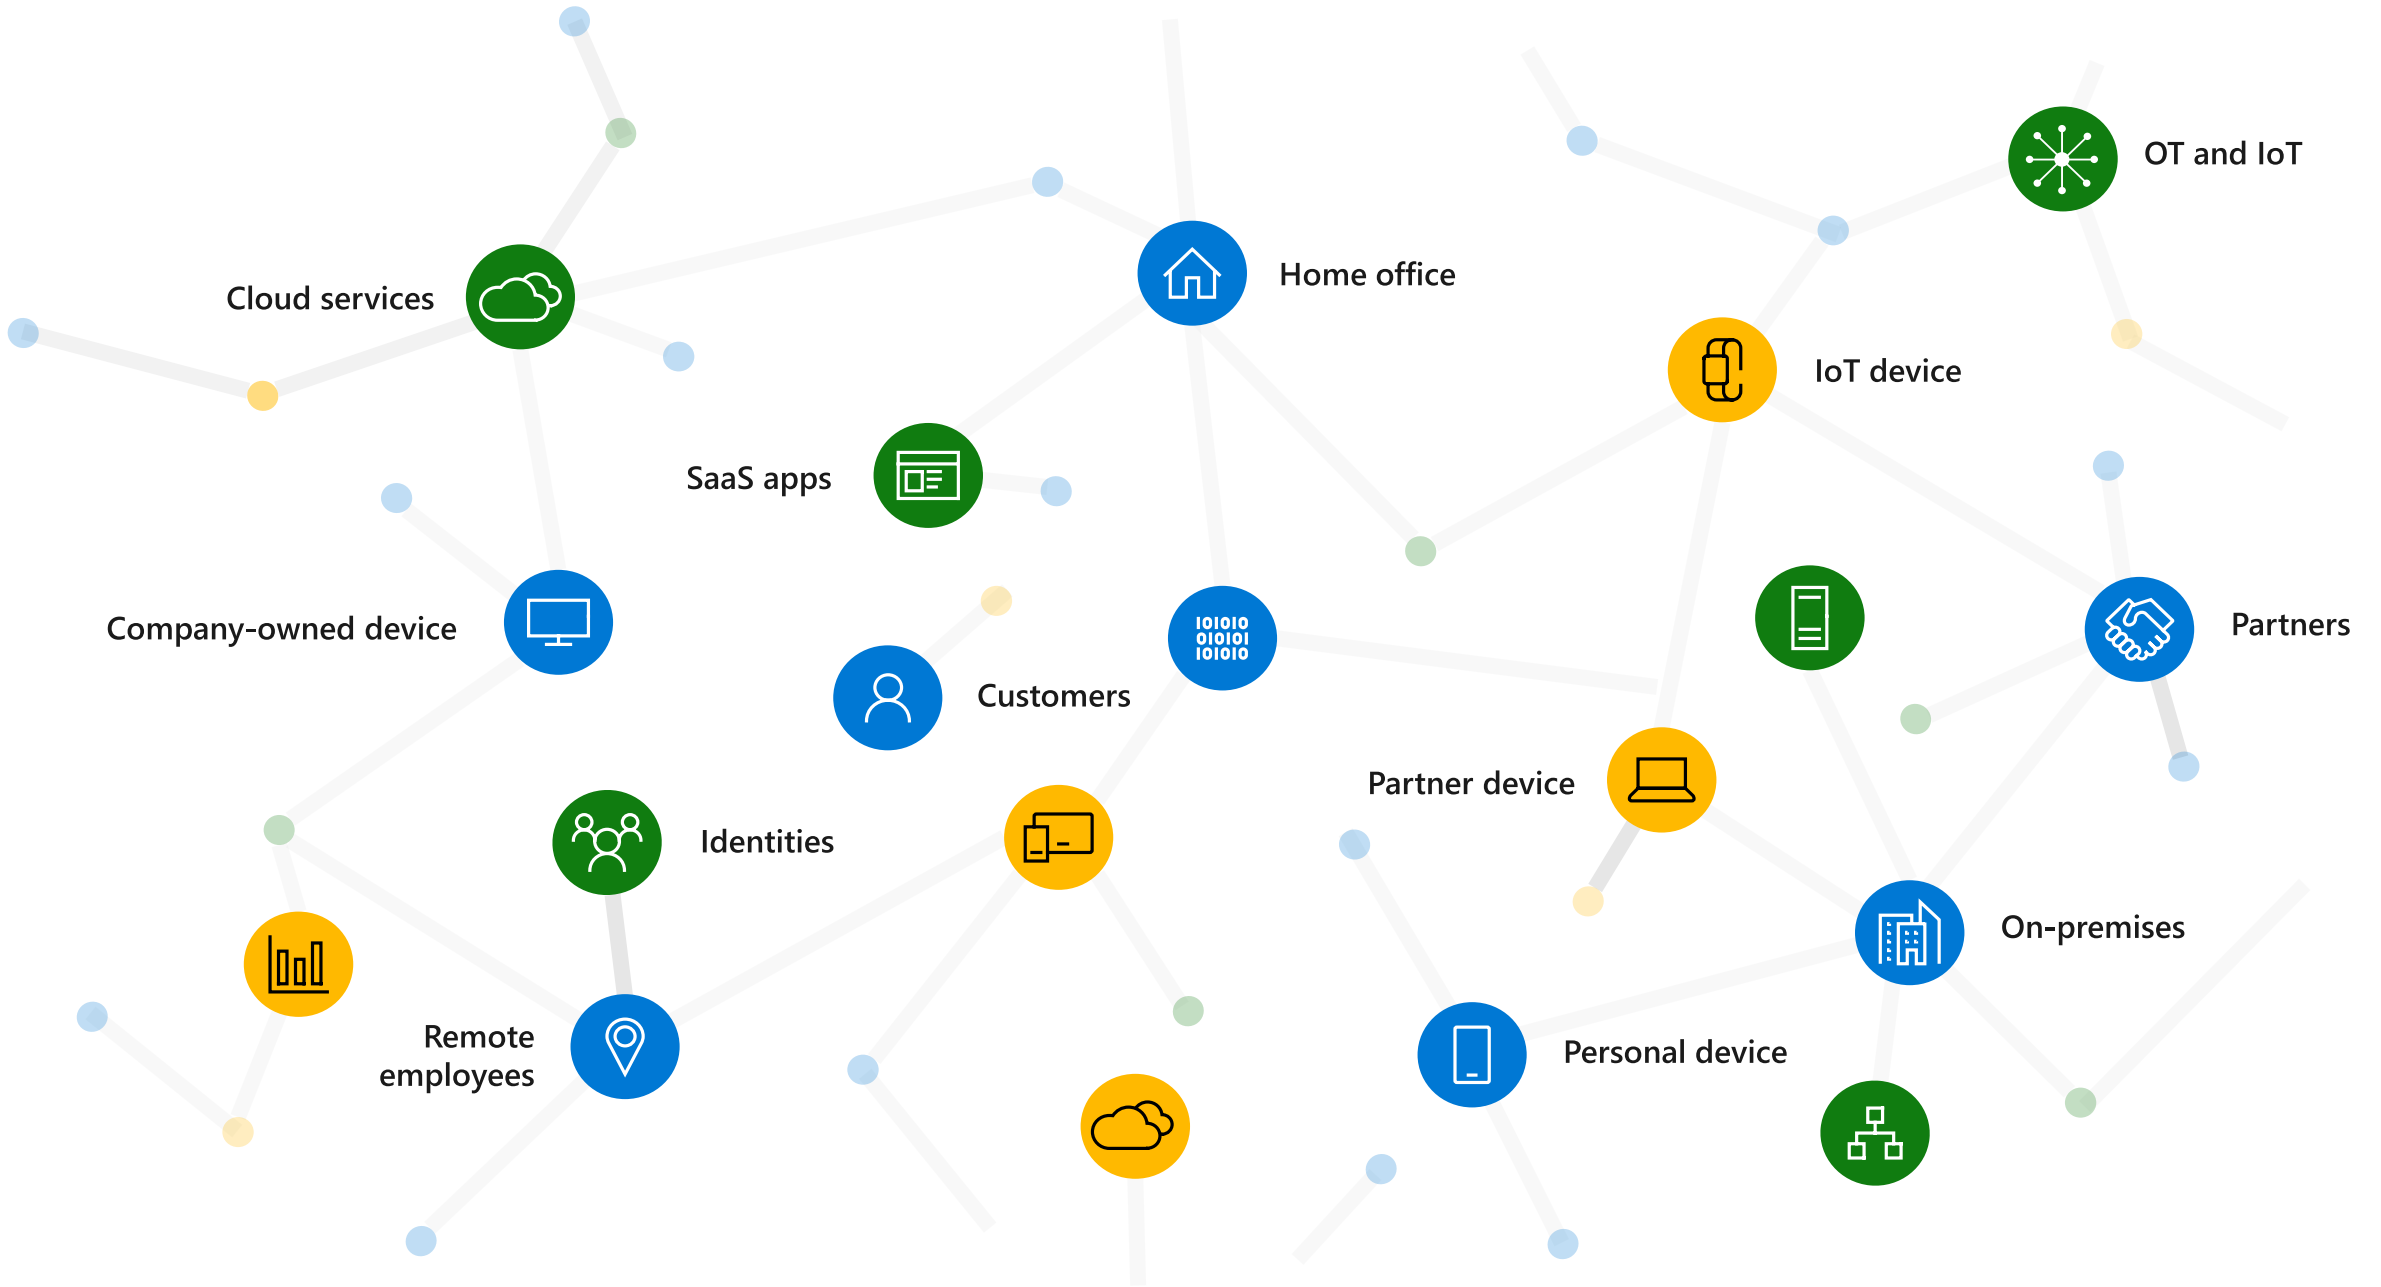

Cyber attacks are becoming more
frequent and sophisticated

Pressures to address
multicloud IT environment

Increasingly **demanding**
regulatory landscape

The technology environment has never been so complex

Microsoft on the front lines

Protecting

860K organizations
in 120 countries

Analyzing

43T threat signals
every day

Tracking

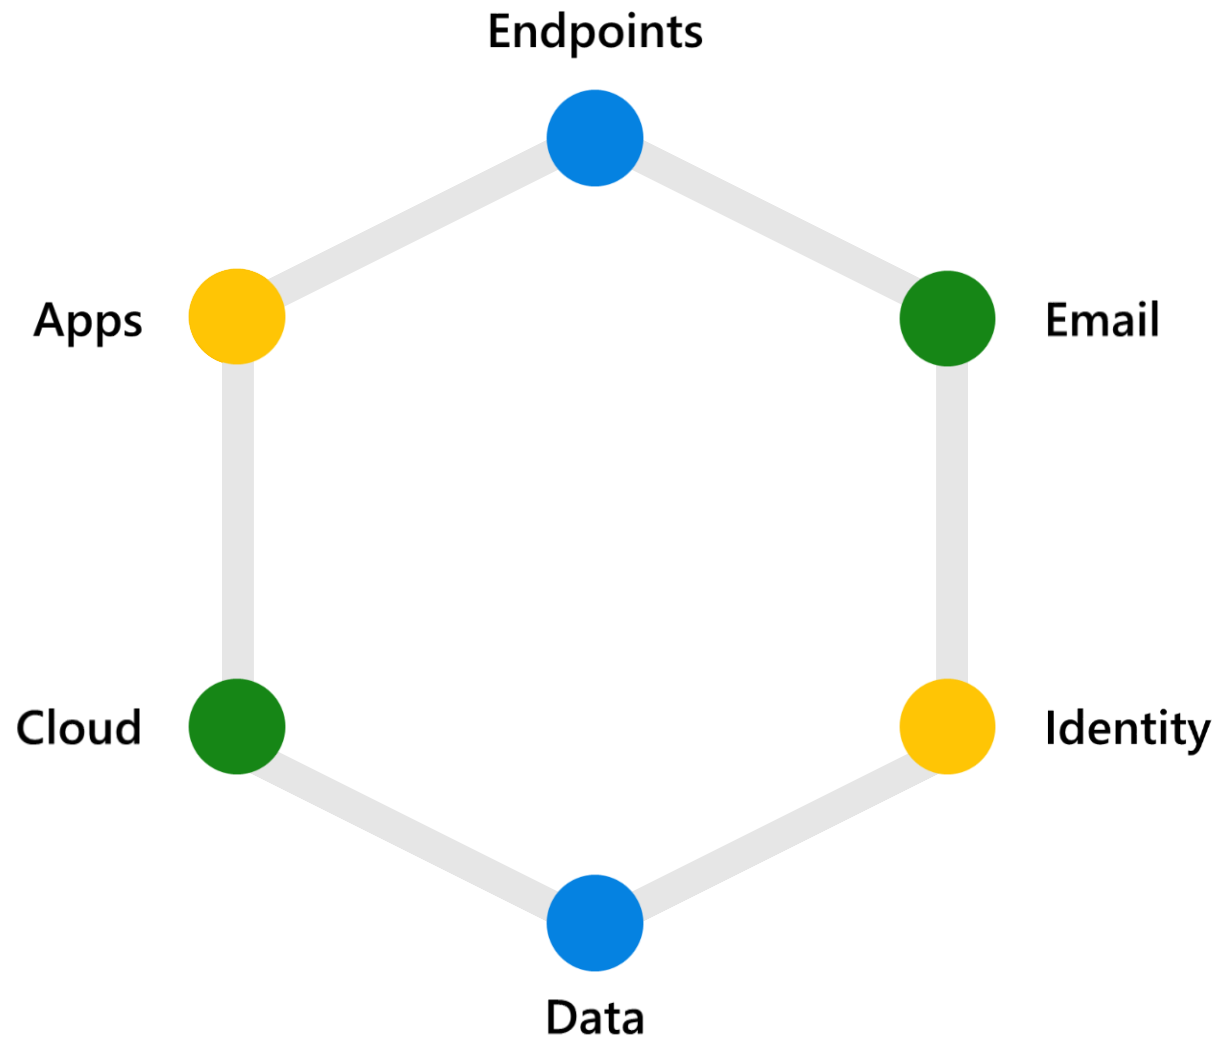

250+ unique nation-states,
cybercriminals, and
other threat actors

Blocked

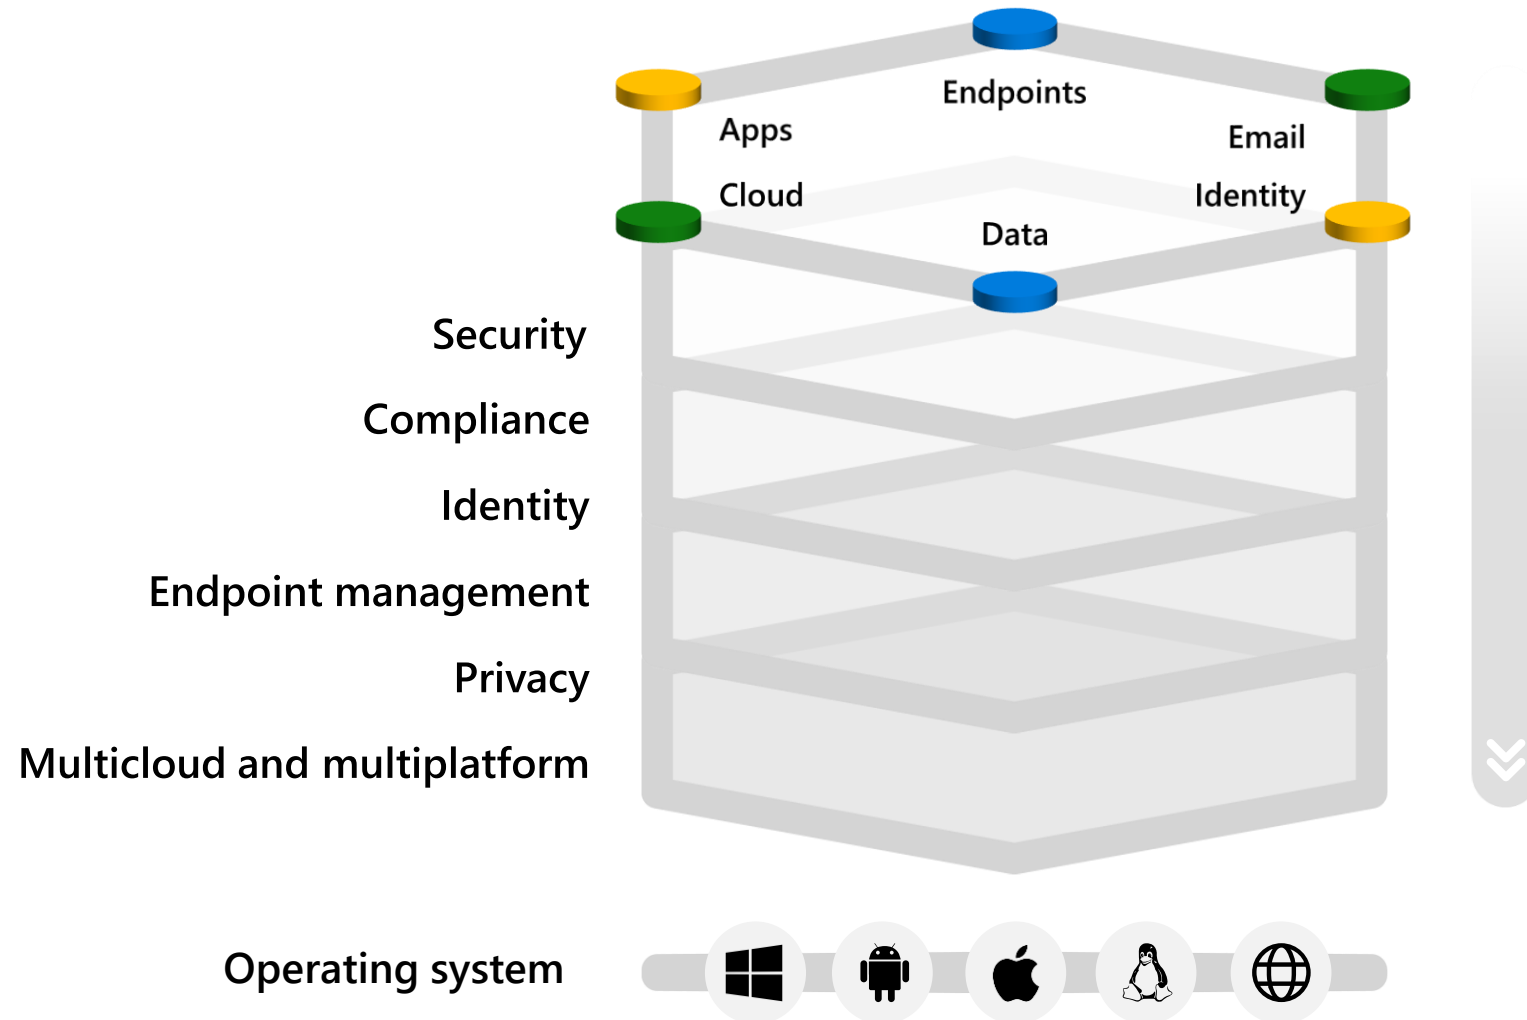

70B attacks
last year

End-to-end protection

A comprehensive approach to security

Microsoft Security

Comprehensive visibility, automation, and intelligence

Protect
everything

Simplify
the complex

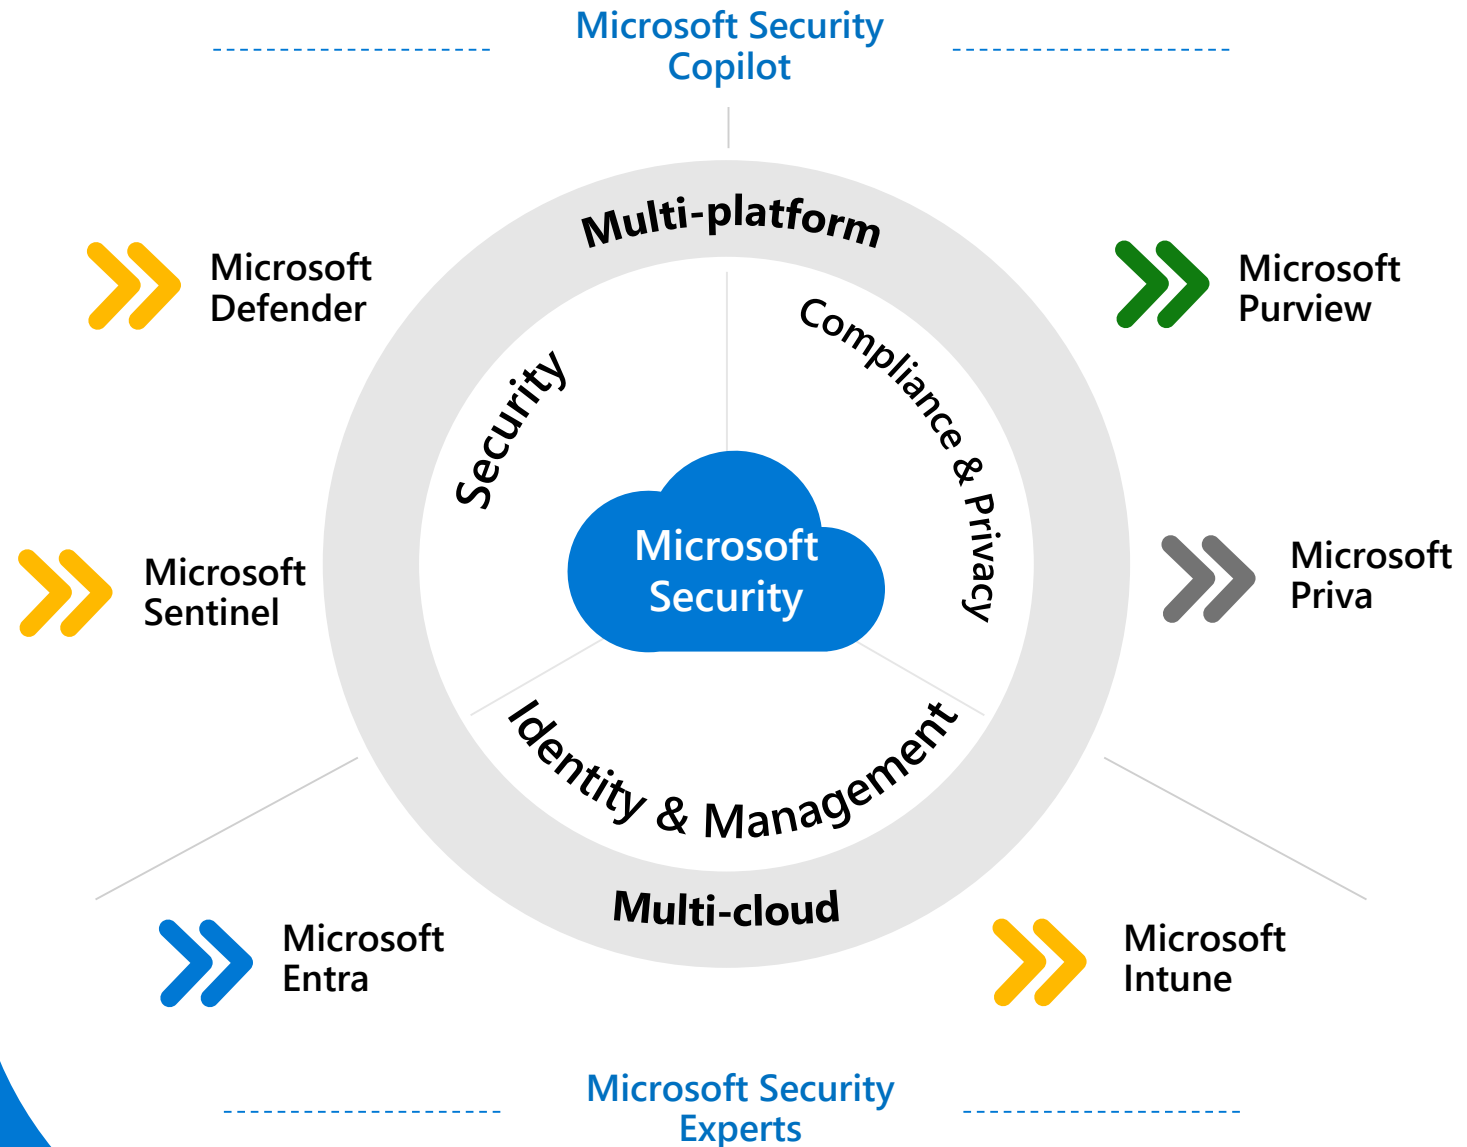

Catch
what others miss

Grow
your future

Portfolio overview

Six product families integrating over 50 product categories

Microsoft Defender + Microsoft Sentinel

Threat protection

Stop threats across your entire organization

- Secure all clouds, all platforms
- Get leading integrated protection
- Deliver rapid, intelligent response

Cloud security

Get integrated protection for your multicloud resources, apps and data

- Strengthen your security posture
- Defend against evolving threats
- Control access to critical apps and resources
- Build secure apps from the start

Microsoft Entra

Secure access

Identity and access management across your digital landscape

- Risk-based adaptive policies
- Seamless experience for any user
- Unified identity management and access to any app
- Simpler identity and access lifecycle

Visibility and control

Govern any identity and any resource with permissions across multicloud

- See all identities and resources
- Detect and right-size unused or excessive permissions
- Automate least privilege everywhere

Identity verification

Verify credentials based on decentralized identity standards

- Create trust with verifiable credentials
- Onboard and recover accounts faster
- Secure access to apps
- Gives individuals control of their data

Microsoft Purview

Data governance

Manage visibility and governance of data assets across your environment

- Map data across your estate
- Make data easily discoverable
- Manage data sharing and access

Data protection

Protect sensitive data across clouds, apps, and devices

- Protect sensitive data wherever it is
- Prevent accidental data sharing
- Classify and govern at scale

Risk and compliance management

Identify data risks and manage regulatory compliance requirements

- Manage insider risks and compliance
- Investigate policy violations
- Reduce risk with built-in automation

Microsoft Priva

Privacy management

Safeguard personal data and build a privacy resilient workplace

- Identify critical privacy risks and conflicts
- Automate privacy operations and responses to subject rights requests
- Empower employees to make smart data handling decisions

Microsoft Intune

Endpoint management

See, secure, and manage all
endpoints in one place

- Manage any device with a single, unified tool
- Protect data both on company-owned and BYO endpoints
- Power better end user experiences

Microsoft Security Copilot

AI-powered security analysis tool that enables analysts to respond to threats quickly, process signals at machine speed, and assess risk exposure in minutes.

Microsoft Government Security Programme

The GSP provides participants with the confidential security information and resources they need to trust Microsoft's products and services
