Masakhane is a **grassroots AI organisation** whose mission is to **strengthen and spur NLP research in African languages, for Africans, by Africans.**

Masakhane roughly translates to “We build together” in isiZulu.

Our goal is for Africans to shape and own these technological advances towards human dignity, well-being and equity, through inclusive community building, open participatory research and multidisciplinary.

# Goals of the Project

***Liberate and prepare textual multilingual*** data from Government Communication Information System [GCIS] of the South African government.

***Extract and align sentence pairs*** for all South African languages within the data.

***Automate*** as much of the process as possible.

Provide ***benchmarks for Machine Translation*** using this data.

***Release*** the cleaned and machine readable data openly for other researchers to use.

# Cabinet Statements

## What is this source?

- Statement of Cabinet Meetings of the South African government.
- A few weeks after the English statement is published, **translated statements are made available.**

## Need

- **Extract statements** and make them easily accessible for NLP.
- Automate the process with **monitoring of website changes** and grow the dataset.

The screenshot shows the South African Government website (www.gov.za) with the national flag and coat of arms. The page is titled "Xitatimente hi mayelana na Nhlengeletano ya Khabinete ya le moyeni Ravunharhu, 31 Mhawuri 2022" (Statement of the Cabinet Meeting of the 31st of September 2022). The date is "1 Sep 2022". The statement is in Xhosa, discussing economic indicators. A sidebar on the right offers translations into various South African languages: English, Afrikaans, isiNdebele, isiXhosa, isiZulu, Sesotho, Sepedi, Setswana, Siswati, Tshivenda, and Xitsonga.

Cabinet Statements

Statement on the Cabinet Meeting of 16 November 2022	18 Nov 2022

# Vuk'uzenzele Gov Newspaper

What is this source?

- “Vuk'uzenzele is a free Government Newspaper, committed to making a difference in the lives of South Africans”
- Published in 2 editions per month. Available physically and digitally [PDF] in all 11 South African languages.

Need

- **Extract text from PDFs.** Clean and make them easily accessible for NLP.
- Make the **extraction process repeatable** with humans in the loop.

<https://www.vukuzenzele.gov.za/>

Health • Rural Development • Employment • Safety & Security • Education

**Sihle Manda**

Consumed by boredom while stuck in her flat in Cape Town at the height of the COVID-19 one evening, Namhla Dotwana had a light bulb moment that gave birth to a blossoming start-up.

Dotwana, 31, founder of Namhla Collection, recounted her journey to Vuk'uzenzele.

Namhla Collection is an innovative organic skincare range business based in Egotyibeni village in Tsolo, in the Eastern Cape.

The start-up journey began when Dotwana remelted an old cinnamon-scented candle deformed by harsh sunlight on her window sill.

When the media relations practitioner's contract with the City of Cape Town's social development unit lapsed at the end of 2020,

# Data Characteristics for Aligned Translations

Table 5: Characteristics of the translation data for the Vuk'uzenzele (Vuk.) datasets

<b>Translation Direction</b>	<b>Size #sents (#src / #trg tokens)</b>
nbl→eng	136 (3.4k / 3.9k)
nso→eng	1715 (53.7k / 41.6k)
ssw→eng	1588 (29.9k / 37.6k)
sot→eng	260 (9.9k / 7.5k)
tsn→eng	1366 (49.8k / 31.7k)
tso→eng	1998 (58.9k / 46.6k)
ven→eng	230 (9.1k / 7k)
xho→eng	1338 (25.8k / 31.5k)
zul→eng	1874 (34.1k / 43k)

Table 6: Characteristics of the translation data for the ZA-gov-multilingual (Gov.) datasets

<b>Translation Direction</b>	<b>Size #sents (#src / #trg tokens)</b>
nbl→eng	3513 (63.9k / 107k)
nso→eng	14742 (460.9k / 375k)
ssw→eng	15139 (291k / 377.8k)
sot→eng	4995 (145.9k / 153.5k)
tsn→eng	14068 (493.1k / 362.2k)
tso→eng	15393 (466.4k / 381.2k)
ven→eng	3404 (68.2k / 96.6k)
xho→eng	15853 (318.2k / 389.5k)
zul→eng	15503 (327.5k / 384.1k)

# MT Results

The highest BLEU scores are distributed across the ZA-gov-multilingual and Autshumato NMT models

ZA-gov-multilingual models achieving a higher score for **Setswana, Xitsonga and isiZulu**

Highest benchmark result for **Xitsonga** across all datasets, demonstrating the effectiveness of transfer learning for new low-resource language datasets.

Our contributions:

- Extend the benchmark translation resources (in the government data domain) to **isiNdebele, isiXhosa, siSwati and Tshivenda**
- Broaden the translation direction **beyond English** as the source language.

It is noted that variations in the Autsumato subset selections will yield different results and an in-depth analysis is left for future work.

Table 4: BLEU scores for Massively Multilingual Transfer on xxx-eng translations using the Vuk’uzenzele (Vuk.), ZA-gov-multilingual (Gov.) and subsets of the available Autshumato datasets (Aut.)

Translation Direction	BLEU		
	Vuk.	Gov.	Aut.
<b>nbl</b> →eng	7.33	8.04	<b>12.24</b>
nso→eng	9.29	<b>26.50</b>	-
ssw→eng	4.80	<b>28.72</b>	-
<b>sot</b> →eng	4.55	10.21	<b>14.83</b>
tsn→eng	2.80	<b>29.68</b>	28.04
<b>tso</b> →eng	13.86	<b>35.40</b>	32.10
<b>ven</b> →eng	2.32	9.68	<b>17.24</b>
xho→eng	6.05	26.81	-
zul→eng	9.97	<b>30.03</b>	25.90

# A few shot learning approach for a multilingual recommendation system for Agro-Information Question Answering

- In many Sub-Saharan African households, smallholder farming is at the centre of their income and food security and face many challenges without any resources
- To bridge this gap , building low IT maintenance support systems , can provide support and reach a vast majority of smallholder farmers in need.

This led to the following research question:  
**Can the main concept of Pattern exploiting training (PET), which is a few shot fine-tuning method limited to text classification, be adapted for closed domain multilingual extractive question answering ?**
